

A leader in the new generation of discussion forum solutions, FuseTalk makes the promise of easy, affordable and effective online collaboration real. If you are looking for an advanced and complete discussion forum solution for your distance learning, classroom and/or faculty websites, FuseTalk Education Edition is the product that you need. Create multiple unique and secure forums for each classroom, support hundreds and thousands of users easily on a single server, share documents, create surveys, and much more.

Many schools and school boards already have websites – using FuseTalk forums adds another dimension to that online presence.

Remember, this generation is far more likely to go online than to use traditional approaches – and a “green”, zero-footprint technology is attractive to students and teachers. It’s a significant benefit that the information is always being retained for future improvement and historical analysis.

FuseTalk Log-in View

FuseTalk allows for unlimited forums, so communities can easily be segregated. Each forum may contain unlimited categories, and each category unlimited topics.

Because parents and teachers need assurance that security, protection and confidentiality is paramount, FuseTalk offers the ability to lock down categories or password protect a specific category, so that only certain individuals are permitted access. Permissions can be quickly defined – setting different parameters for students, teachers, parent groups, and administrative staff – which will meet any school board’s privacy policies. If required, categories can be moderated, allowing each message to be examined before it is posted to the community at large. There is the ability to ban individuals not complying with the rules, and a filter so that unacceptable or profane words do not appear in messages.

FuseTalk features powerful e-mail based functionality. Groups or individuals can subscribe to topics and categories, and receive update notifications in real time or in digest form. Forum administrators can synchronize a category with a mailing list, or enable e-mail posting so that users can follow a category by e-mail. In an education portal, all subscribed parents would be informed when the category “Significant Policy Changes” received a change in content; for example, all students in a particular science course would receive an e-mail when a new assignment was posted.

A forum can be, virtually, all things to all people within the academic community. A primary function would be the creation of categories where teachers and students can communicate. Course material lists and presentations could be published, lecture/lesson notes can be easily updated, and URLs of resources available to students can be kept current. Students can access the portal at any time, day or night – there is no reason to miss an assignment.

The screenshot shows the FuseTalk forum interface for 'Class 9EU'. The page title is 'FuseDiligence for Education'. The breadcrumb trail is 'FuseDiligence for Education > Languages Department > Grade 9 English > Class 9EU'. The user 'MsTolliver' is logged in. The main content area displays a table of topics with columns for Topic Title, Replies, Views, Originator, and Last Post. Below the table is a statistics section showing 7 registered users, 3 currently logged in, and 1 guest browsing.

Topic Title	Replies	Views	Originator	Last Post
9EU - List of Novels for Independent Study	0	1	MsTolliver	08/30/2010 01:17 PM by MsTolliver
9EU - Course Outline	0	2	MsTolliver	08/30/2010 01:16 PM by MsTolliver
9EU - Resources	0	1	MsTolliver	08/30/2010 01:15 PM by MsTolliver
Ms Tolliver's 2nd period homework board	0	5	MsTolliver	08/30/2010 01:14 PM by MsTolliver
Ms Tolliver's 4th period homework board	0	2	MsTolliver	08/30/2010 01:14 PM by MsTolliver
Ms Tolliver's 4th period novel share	1	9	lesley	08/18/2010 02:18 PM by Tallony

 7 users are registered to the FuseDiligence for Education forum.
 There are currently 3 users logged in.
 The most users ever online was 4 on 08/30/2010 at 01:09 PM.
 There are currently 1 guests browsing this forum, which makes a total of 4 users using this forum.

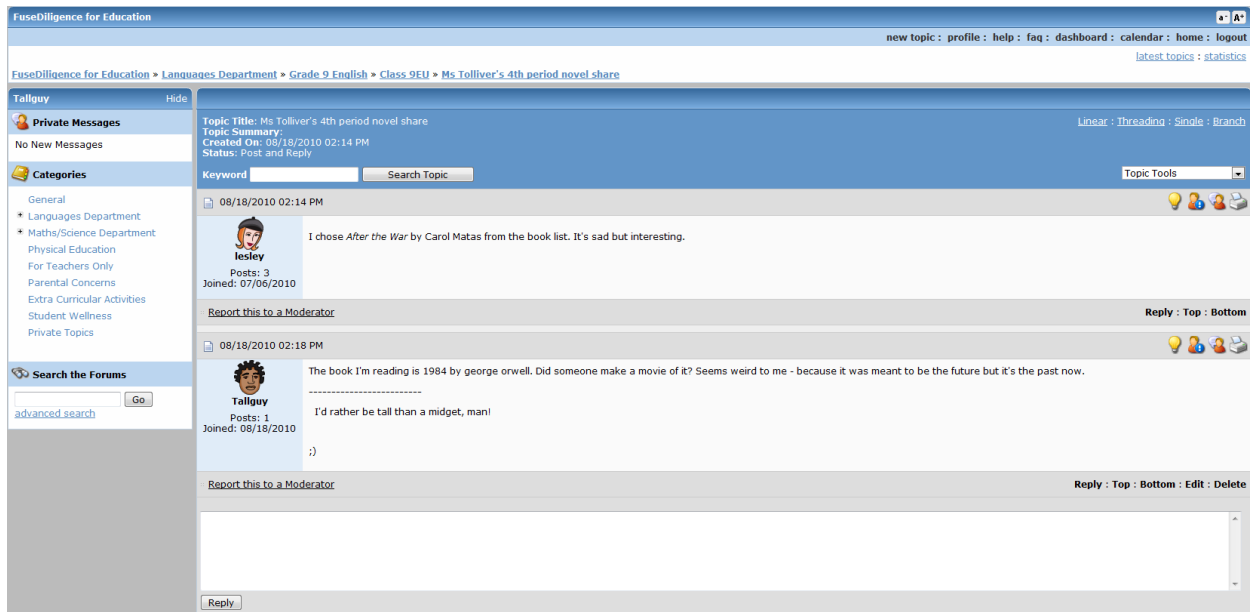

FuseTalk User View – List of Topics

Students, teaching assistants and teachers can discuss materials and homework. For structured curriculums, answering one question benefits many – for creative and interactive curriculums, collaborative discussion can take place in the form of debate.

Interactive parent/teacher communication makes teachers and administrators more accessible to the parents of students.

Schools can publish relevant content, such as:

- curriculum outlines
- policy, and changes to policy
- changes under consideration (seeking feedback from parents)
- fee structures and fundraising initiatives
- field trip and permission-based activities, including necessary documentation to be completed
- behaviour expectations

FuseTalk User View - Discussion

Categories relating to teacher to teacher, and departmental interaction might include:

- discussion of opportunities to improve curriculums
- sharing teaching techniques/practices
- capture/retain relevant content for future use

In a password protected category, departmental heads, principals and vice principals might:

- discuss trends, crisis management, emergency preparedness
- debate budgets, optimize spending
- publish policy

A category devoted to student wellness and career aspirations might:

- provide links to articles and web sites related to physical and mental well being issues
- provide discussion around coping with stress, assisting with volunteer efforts, improving quality of life
- provide links to career paths and further education

Students and parents, alike, will easily add content to these categories via a familiar, flexible editor, which supports HTML and spell checking. Messages may include attachments; FuseTalk provides the ability to control the types and sizes of documents, images, and videos that can be stored and/or attached to topics.

The screenshot displays the FuseTalk user interface for creating a new message. The interface is split into a left sidebar and a main content area. The sidebar shows the user 'MrsHutchings', a 'Private Messages' section with 'No New Messages', and a 'Categories' list including 'General', 'Languages Department', 'Maths/Science Department', 'Physical Education', 'For Teachers Only', 'Parental Concerns', 'Extra Curricular Activities', 'Student Wellness', 'Private Topics', and 'Trash Bin'. Below the categories is a 'Search the Forums' section with an input field and a 'Go' button. The main content area is titled 'Posting in Category: Student Wellness' and contains a 'Message Information' section with a 'Message Title' field (containing 'Preventing the Common Cold') and a 'Topic Summary' field. Below this is a 'Message Text' section with a rich text editor toolbar and a text area containing two paragraphs about colds and a mention of an attached booklet. At the bottom of the main area are checkboxes for 'Subscribe to this topic' and 'Do not parse emoticons', an 'Attachments:' section with an empty input field and 'Attach File(s)' and 'Clear File(s)' buttons, and a 'Sticky this thread for' dropdown menu set to 'None'. A red arrow points to the empty input field in the 'Attachments:' section.
